

Getting Started with Expression Web

Getting started with Expression Web is easy; we have great resources for beginners and experts alike. Teachers and students can learn the basics of Web design within just a few hours. You can be ready to teach your students faster than you think is possible.

Step 1: Expression Web sneak-peek videos

View these videos for a quick overview of the software & beginning Web design techniques:

Create a Template-based Web Site

Expression Web makes creating new web sites even easier by providing web site templates that can be used as starting points when creating a new site. This video demonstrates how to create a new web site using one of Expression Web's built in templates. (5 minutes)

Step 2: Check out these "teacher-created, student-tested" teaching & learning materials:

<http://expression.microsoft.com/education>

Start with the Expression Web Quick Start Tutorial: Beaches Around the World.

This tutorial is a student activity in Module 5 of the semester curriculum, *Introduction to Web Design using Microsoft Expression Studio*. (When you attempt to download the materials, if you are asked to "Verify" that you are a teacher, look for the link on that same window that says "Skip this step.")

Step 3: Learning more about Expression Studio

Expression is a professional Web design program that is easy enough for students to learn quickly.

Explore the 5 applications of Expression Studio.
